

Karime Martinez

Health and Safety
Strategist
Business Operations &
Data Analyst

Portfolio 2026

Executive Summary

Hi, I'm **Karime Martinez**

A visionary Health & Safety Leader and Strategist with over 15 years of experience driving operational excellence across large-scale, complex organizations.

As an Industrial Engineer and Risk Administrator equipped with specialized postgraduate degrees in Occupational Health and Safety, Data Analytics—and currently pursuing an MBA—I bridge the gap between *regulatory compliance, sustainability, and technological innovation*.

My expertise lies in **transforming traditional H&S departments from reactive units into proactive, data-driven strategic assets.**

My focus goes beyond traditional regulatory compliance, I design agile, tech-driven architectures for management systems that ensure human sustainability and guarantee operational excellence.

Executive Summary

I thrive in results-oriented settings, acting as a highly self-managed strategic partner to the C-Suite.

By optimizing processes, automating workflows, and leveraging business intelligence, I provide the real-time data and operational insights necessary to facilitate high-level decision-making and drive corporate goals forward.

Driving operational excellence and human sustainability through data analytics, agile workflows, and robust regulatory compliance.

Core Competencies & Value Pillars

Human Sustainability & Cultural Transformation:

- Translating physical and psychological well-being into operational continuity, aligning OHS performance with broader corporate ESG and CSR goals.
- Prosci® Certified Change Practitioner and Behavior-Based Safety (BBS) expert under the Dupont methodology.
- Empowering autonomous, preventive leadership across all organizational levels to build self-sustaining safety cultures.
- Expert in designing and implementing high-level OHS governance models, ensuring safety standards are embedded within the core corporate strategy rather than treated as peripheral compliance.

Core Competencies & Value Pillars

Integrated Risk & Compliance Governance:

- Leadership and administration of Management Systems -HSEQ / OHS / Road Safety.
(ISO 45001, ISO 14001, ISO 9001, ISO 39001, Decree 1072, Res. 0312, Res. 40595)
- Assurance approach through Management Systems Auditing skills.
(ISO 19011)
- Specialized expertise in critical control for high-risk tasks (heights, confined spaces, lifting,etc), chemical hazard management (GHS).
- Strategic planning of major maintenance shutdowns in complex manufacturing environments.
- Advanced incident investigation utilizing RCA and ICAM methodologies to close systemic operational gaps.

Technological Innovation

- HSE 4.0 Digital Architecture & Implementation
- Predictive Risk Modeling

Operational Excellence & Data Intelligence

- Business Intelligence (BI) & Dashboard Architecture
- Data Governance & Advanced Analytics
- Standard Operating Procedure (SOP) Optimization
- Agile Workflow Automation

Agile Operations & Data Architecture:

- Design of robust digital ecosystems integrating Python, R, and AI/LLM logic to transform raw data into predictive risk models.
- Workflow automation using Low-Code/No-Code tools (AWS, Power Apps) to optimize field operations and guarantee agile processes.
- Advanced Business Intelligence visualization (Power BI, Tableau, Looker Studio) for real-time, C-Suite level reporting.

Education & Certifications

**Master in Business
Administration**

**Specialist in Data
Analytics**

**Specialist in
Health & Safety**

**B.S. Industrial
Engineering**

**Bachelor's in Risk
Administration**

**Associate in Safety
& Hygiene**

Outstanding Outcomes

Operational Excellence at Industrial Scale

colcafé

- Colcafé S.A.S. | OHS Coordinator (2024–2026): Strategic OHS leadership for 950+ employees, 2 sites.
- Cementos Argos S.A. | EHS Information Professional (2022–2024): Transnational strategic support for operations across North, Central, and South America.

Transforming Health & Safety into a Strategic Business Advantage

Orchestrated massive culture-accelerating networks impacting over 1,000+ employees, successfully transitioning diverse teams from reactive supervision to autonomous, interdependent preventive leadership.

Led the alignment of OHS targets with global 2030 Sustainability Goals, translating technical performance metrics into executive-level dashboards that facilitated real-time decision-making for the C-Suite.

Directed OHS strategy during scheduled plant shutdowns for maintenance and massive infrastructure projects, managing hundreds of contractors simultaneously to achieve zero fatalities and zero LTIs while maintaining project critical paths.

Standardized safety processes and critical risk governance across international operations (USA, Americas, Asia, Colombia), eliminating information gaps and ensuring global compliance consistency.

Spearheaded the deployment of digital HSE architectures that transitioned management from reactive systems to predictive data-driven environments.

Let's Connect

If you are looking for a senior leader who can translate technical complexity into measurable business value—while operating with full autonomy—let's discuss how I can support your organizational goals.
